

How to Activate Microsoft Office 2011 on a Mac

Microsoft Office 2011 now has a sign-in field to activate this product. This option is only supported on OS X 10.6 and above. The sign-in option is not supported prior to OS X 10.6. After installation of Office 2011 open an Office program to bring up the activation window. Click the second option "Sign in to an existing Office 365 subscription."

Enter your Office 365 email address and click next.

Type in your password and click Sign In. You will be greeted with a final screen confirming activation and you'll be all set!
