•	Last chapter, we saw how Arab Muslims created a vast Islamic civilization that eventually spread from Spain to the Indus River. The Ottomans, a originally from
	Central Asia, emerged as rulers of the Islamic world in the 13 th century. In 1453, they succeeded in capturing
	, the capital of the Byzantine Empire. The Ottoman Empire was located between
	Europe and Asia and interacted with both throughout its history.
•	For a time, the Ottomans cut European trade with Asia and took control of the Mediterranean. The Ottomans
	also conquered, re-uniting all of the Muslim world under their rule,
	except for Persia and Afghanistan. They also conquered parts of Eastern Europe.
•	By the mid-1500s, under, the Ottoman Empire reached its height.
	The Ottoman fleet controlled much of the trade in the until their defeat
	in 1571 by Spaniards and Venetians.
•	At the heart of the Ottoman system was the
	The Sultan in Istanbul (Constantinople) governed the entire empire as an all-powerful ruler. Under the Sultan's
	rule, the early Ottoman Empire was well-organized and efficiently governed. He was assisted by a special army –

•	The Ottomans recognized the cultural diversity of their empire.
	communities were represented by their own leaders. These communities were governed by their own laws and
	collected their own taxes. These methods of government, as well as Ottoman control over the crossroads of
	trade, promoted prosperity and stability.

Song Dynasty (960-1279)

•	After the fall of the Tang Dynasty in 907,
	In 960, the Song Dynasty emerged in the south. Later, a rival dynasty was established in the north. Despite this
	reduction in area, Song China continued to build upon the achievements of the Tang.
•	The Song Dynasty was one of the most brilliant cultural eras in Chinese history. It was a time of great social and
	economic progress. China saw the first use of, making it possible to
	rather than grain. The government further minted
	strings of standardized coins, made of copper and iron.
•	The Song also These factors helped
	bring about a large increase in farm production, which led to greater wealth for China's people and government.
•	Song China was the most populous and advanced civilization of its day. Merchants, craftspeople, and scholars
	lived in the larger Bustling shops lined city streets. The Song capital housed
	more than a million people. China engaged in trade with many other parts of the world.
•	, connecting Beijing, the Hwang Ho, and the Yangtze River, was used
	to ship grain within China. Caravans carried silks over the Silk Road. Large ships brought Chinese goods to
	Korea, Japan, Southeast Asia, India, and Africa.
•	Science and technology also made advances. Song astronomers developed new instruments; doctors studied
	; and mathematicians solved advanced equations. They introduced the use of
	, the compass in navigation, and invented moveable type for printing.
•	The greatest threat the Song faced consisted of tribes on China's northern border. In order to secure their
	borders, the Song allied themselves with a new people in the north, the The alliance
	proved to be a mistake. The Mongols soon overran the empire and established a foreign dynasty to rule over
	China –

China	's Influence on Japan
•	One area deeply influenced by Chinese culture was Japan. Chinese and Korean scholars and merchants brought
	many aspects of Chinese culture to Japan, a group of islands located close to Korea. Confucianism instilled
	taught the Japanese
	to renounce selfish desires, while Daoism encouraged a

	art dance and even cooking influenced languese styles and tastes. The languese were greatly impressed by the

	quality of many Chinese goods, such as The ruler of Japan set up an
	imperial court, in imitation of China, and declared himself emperor.
•	Although greatly influenced by China, Japanese society was not an exact copy. As time passed, Japanese
	emperors freed some of their nobles from their tax burdens. Many began
	to raise their own private armies of warriors. The imperial government, collecting less taxes, grew weaker.
•	Open warfare finally broke out between the In 1192, one of
	the nobles emerged as the most powerful. Instead of overthrowing the emperor, he had the emperor appoint
	him as Japan's "Supreme Military Governor," known in Japanese as the For the next
	600 years, the Shoguns were the real rulers of Japan, with the emperors merely acting as figurehead.
•	The Shogun stood at the top of To provide military protection for their
	lands, noble landowners recruited – knights on horseback with armor of
	leather and iron, and swords. Each samural swore an oath of loyalty to the emperor and to his local daimyo
	(noble). A samurai promised to follow a (bushido) that
	emphasized the loyalty of the samurai to the daimyo. In return for this loyalty, the daimyo provided the samurai
	with social status and economic support.

	A Mongol leader named Chinggis Khan (or Ghengis Khan) united the various Mongol tribes by 1206. After he
	had established himself as undisputed master of Mongolia, he set out on a career of conquest. Chinggis Khan
	next began attacking neighboring peoples beyond Mongolia.
•	Others had little chance against, riding with sturdy stirrups,
	carrying strong bamboo bows, and attacking cities with giant catapults. The Mongols became known for their
	fierce brutality, sometimes killing all the defenders of a city that refused to surrender without resistance.
•	Chinggis Khan attacked Northern China, successfully taking the city of Beijing. In 1219, he turned westward and
	captured the

•	Although he was greatly feared as a brutal warrior, Chinggis Khan was
	within his conquered territories. He made use of local administrators and craftspeople. He promoted trade
	throughout the vast Mongol Empire and even ordered the creation of a written script for the Mongol language.
•	Under Chinggis Khans' successors, Mongol rule extended into
	The Mongols then held sway over one of the largest empires the world has ever seen – from the Black Sea to the
	Pacific Ocean. Under this "," people could safely trade from one end of the
	empire to the other. The Mongol Empire was so vast that it soon divided into four separate kingdoms, each
	ruled by a different descendant of Chinggis Khan.
The Yu	an Dynasty
•	Chinggis' grandson, Kublai Khan, was born a Mongolian, but developed a great fascination with Chinese culture,
	traditions, and art. He became emperor of In 1279, he reunited
	Northern and Southern China under his rule. Mongols served as his,
	ruling China with the help of Chinese officials. Kublai Khan encouraged the Mongols to adopt Chinese ways and even adopted the Chinese name Yuan for his dynasty. He claimed the

Mongo	ol Influence on Russia
•	In the 13 th century, Mongol warriors also conquered most of Russia. They controlled it for the next 200 years.
	Mongol words, customs, and even clothing styles found their way into Russian culture. Moscow and its
	surrounding territories, known as, became the strongest Russian state.
	Muscovites eventually rebelled against the Mongols. In 1480,
	declared Muscovy's independence from the Mongols. He proclaimed himself Tsar ("Caesar" or Emperor). Ivan
	soon set about increasing Muscovy's size by conquering neighboring lands.
The Ru	lle of Tamerlane
•	In the 14 th century, Mongol power enjoyed a brief resurgence in Central Asia,
	a Turkish-Mongol ruler, expanded his kingdom from Samarkand into Persia, Afghanistan, Russia, Syria, Turkey,
	and Northern India. Tamerlane was known for his and his massacre
	of civilian populations. His empire did not long outlast his death.
The Mi	ing Dynasty (1368-1644)
•	Despite their achievements, the Mongols remained unpopular in China. In 1368, the Mongols were overthrown
	by a, who established the Ming Dynasty.
